Mixing ratio:	Ready for use
Hardener:	not required
Thinner:	not required

Processing

	Nozzle: 1.0 mm Pressure: 2.0-4.0 bar Sprayer pressure: 0.7 bar		Nozzle: 1,0-1,3 mm Pressure: 2,0-4,0 bar Sprayer pressure: 0,7 bar
	1-2 thin spray coats 2-3 thin spray coats for large surfaces		- Flash-off time between spray coats is 2-5 minutes
	3 – 6 µm		12 s 4 mm DIN /20°C

Drying

	Approx. 30 minutes at 20°C		Approx. 10 minutes at 60°C
For large areas, drying at 60°C is recommended in any case.			

Further processing

	After drying, AP-Merit Chrome Effect can be painted over with 2K clear coats (e.g.: AP-Merit 7525 UHS Premium clear coat).
---	--

Notes

	<ul style="list-style-type: none">- The substrate must be primed in black. For the best effect, a 2K uni top coat is recommended. The substrate must not be sanded again. If necessary, polish out any imperfections.- When applying the chrome effect paint, it is important to ensure that the paint is applied very thinly and evenly. It is recommended that the effect paint is carefully sprayed on. Less is more! Do not apply layers that are too wet!- MASTER TIP: To get the exact effect, always create a spray pattern in advance. The more black shines through, the more pronounced the effect!- Application temperature: from + 18°C
	Store in a dry and frost-free place. Can be stored for at least 12 months in the sealed original container.
